PROFESSIONAL EXPERIENCE

QA Engineer

[Cognizant Technology Solutions](#) | Hyderabad, India | Oct 2024 – Present

Project: AEL – Digital Platform | Client: American Equity Investment Life Holding Company (AEL), US | Team Size: 50

Tools: JIRA, qTest, PGAdmin (PostgreSQL), Postman, Rest Assured (Java), AWS Datadog, CloudWatch, Step Functions, Lambda, Git

- Performed API manual testing using Postman — designed and executed 200+ test cases (functional, regression, smoke, integration, negative) for 20+ REST API endpoints; validated payloads, status codes, headers, and authentication.
- Built and maintained API automation test suite using Rest Assured (Java) — automated regression, smoke, and integration tests, reducing manual effort by 40%.
- Monitored API execution with AWS — CloudWatch for post-execution log analysis, Step Functions for workflow state tracing, Lambda for serverless trigger verification, and Datadog for performance dashboards.
- Validated data integrity using PGAdmin (PostgreSQL) — SQL queries (DDL, DML, Joins) to verify API response vs database records; identified 10+ data defects.
- Tracked defects end-to-end in JIRA and participated in Agile Scrum ceremonies — sprint planning, stand-ups, sprint reviews — consistently delivering QA sign-off on time.

QA Engineer Intern

[Cognizant Technology Solutions](#) | Bengaluru, India | Apr 2025 – Jul 2025

- Performed web manual testing — functional, regression, smoke, and negative test cases for web UI flows; tracked and reported defects in JIRA with detailed reproduction steps.
- Built Selenium WebDriver (Java) automation scripts using POM framework; integrated TestNG suite into Jenkins CI/CD pipeline via Maven and Git; handled dynamic elements, browser windows, and frames.
- Executed SQL queries in MySQL to validate UI-to-backend data integrity; authored test plans, defect reports, and traceability matrices aligned with STLC.
