PROFESSIONAL EXPERIENCE

QA Engineer

Cognizant Technology Solutions | Hyderabad, India | October 2024 – Present

Project: AEL – Digital Platform | **Client:** American Equity Investment Life Holding Company (AEL), US | **Team:** 50

Tools: JIRA, qTest, PGAdmin (PostgreSQL), Postman, Rest Assured (Java), AWS Datadog, CloudWatch, Step Functions, Lambda, Git

- Performed API Manual Testing using Postman — 200+ test cases (functional, regression, smoke, integration, negative) for 20+ REST API endpoints; validated payloads, status codes, headers, and authentication.
- Built and maintained API Test Automation suite using Rest Assured (Java) — automated regression, smoke, and integration tests reducing manual effort by 40%.
- Monitored API execution using AWS — CloudWatch for log analysis, Step Functions for workflow tracing, Lambda for trigger verification, and Datadog for performance dashboards.
- Validated data integrity using PGAdmin (PostgreSQL) — SQL queries (DDL, DML, Joins) to verify API response vs database records; identified 10+ defects. Managed defect lifecycle end-to-end in JIRA.
- Participated in Agile Scrum ceremonies — sprint planning, stand-ups, reviews, retrospectives; consistently delivered QA sign-off within sprint timelines.

QA Engineer Intern

Cognizant Technology Solutions | Bengaluru, India | April 2025 – July 2025

- Performed Web Manual Testing — functional, regression, smoke, and negative test cases for web UI flows; logged defects in JIRA with detailed reproduction steps.
- Developed Selenium WebDriver (Java) automation scripts using Page Object Model (POM) — dynamic elements, browser window handling, frames, XPath, and CSS Selectors.
- Integrated TestNG suite into Jenkins CI/CD pipeline via Maven and Git; executed SQL queries in MySQL to validate data integrity; authored test plans and traceability matrices per STLC.
