GitHub: github.com/Ramteja1311

Location: Hyderabad, India

PROFESSIONAL SUMMARY

QA Engineer with 9 months of experience at Cognizant across two roles. Current role (AEL Digital Platform): API manual testing (Postman) and API automation (Rest Assured, Java) for a US FinTech client, with AWS-based monitoring (Datadog, CloudWatch, Step Functions, Lambda) and DB validation (PGAdmin). Internship: Web manual testing and Selenium WebDriver automation (Java, POM, TestNG). B.Tech AI & ML graduate (GPA 8.06) with strong JIRA, qTest, and Agile Scrum skills.

PROFESSIONAL EXPERIENCE

QA Engineer

[Cognizant Technology Solutions](#) | Hyderabad, India

Project: AEL – Digital Platform | Client: AEL (American Equity Investment Life Holding Company), US

Tools: JIRA, qTest, PGAdmin (DB), Postman, Rest Assured (Java), AWS: Datadog, Step Functions, Lambda, CloudWatch, Git | Team Size: 50

- Performed API manual testing using Postman — designed and executed 20+ REST API endpoint test cases validating payloads, status codes, headers, authentication, and error handling.
- Built and maintained API automation test suite using Rest Assured (Java) — automated regression, smoke, and integration API tests reducing manual effort by 40%.
- Monitored API execution using AWS — CloudWatch for log analysis post endpoint hit, Step Functions for workflow state tracing, and Lambda for serverless trigger verification.
- Used Datadog dashboards to monitor API performance — tracked response times, error rates, and service health post-deployment.
- Performed backend database validation using PGAdmin (PostgreSQL) — executed SQL queries (DDL, DML, Joins) to verify data integrity between API responses and database records, identifying 10+ data defects.
- Designed and executed 200+ API test cases (functional, regression, smoke, integration, negative) documented in qTest and linked to JIRA stories with full traceability.
- Performed negative API testing — validated error codes, boundary values, missing mandatory fields, invalid tokens, and unauthorized access scenarios.
- Tracked and managed defects end-to-end in JIRA — reproduced, documented severity/priority, and collaborated with developers for timely resolution within sprint cycles.
- Participated in Agile Scrum ceremonies — sprint planning, daily stand-ups, sprint reviews — consistently delivering QA sign-off within sprint timelines.

QA Engineer Intern

[Cognizant Technology Solutions](#) | Bengaluru, India

- Performed web manual testing — designed and executed functional, regression, smoke, and negative test cases for web application UI flows; tracked and reported defects in JIRA with clear reproduction steps.
- Developed Selenium WebDriver (Java) automation scripts using Page Object Model (POM) framework for a hackathon project — automated Honda bike listings extraction, handled dynamic elements, browser windows, and frames.
- Integrated TestNG web automation suite into Jenkins CI/CD pipeline via Maven & Git, enabling automated regression execution on every build commit.
- Executed SQL queries in MySQL to validate UI-to-backend data integrity; authored test plans, defect reports, and traceability matrices aligned with STLC.

KEY PROJECTS

AEL Digital Platform – FinTech QA | Oct 2024 – Present

Stack: Postman, Rest Assured (Java), JIRA, qTest, PGAdmin (PostgreSQL), AWS: Datadog, Step Functions, Lambda, CloudWatch, Git

- Full QA: API manual + automation (Postman, Rest Assured), DB validation (PGAdmin), AWS monitoring (Datadog, CloudWatch, Lambda).

CORE TECHNICAL SKILLS

Testing Types: Manual, Functional, Regression, Smoke, Integration, UAT, Exploratory, API Testing

API Automation: Rest Assured (Java), TestNG, Cucumber (BDD/Gherkin), Data-Driven Testing

Web Automation: Selenium WebDriver (Java), Page Object Model (POM), TestNG

API Testing: Postman, Rest Assured, RESTful API, JSON, XML, HTTP Methods

Programming: Java, C#, Python, SQL

Database: PGAdmin, PostgreSQL, MySQL, JDBC, SQL Queries (DDL, DML, Joins)

Test Management: JIRA, qTest, STLC, SDLC, Test Planning, Defect Lifecycle, Traceability Matrix

CI/CD & DevOps: Git, GitHub, Maven, Jenkins, Docker (Basic)

AWS Monitoring: Datadog, CloudWatch, Step Functions, Lambda, Log Analysis

Methodologies: Agile (Scrum), Sprint Planning, Daily Stand-ups, Sprint Reviews

Frameworks: Rest Assured Framework, BDD/Gherkin, TestNG Framework

AI & ML: Scikit-learn, XGBoost, Pandas, Azure Data Engineering

EDUCATION

B.Tech – AI & ML

[NRI Institute of Technology, Agiripalli](#)

2021 – 2025 | GPA: 8.06 / 10

Intermediate (MPC) – 86.6%

[Sarada Junior College](#) | 2021

Secondary (SSC) – GPA 8.8

[Narayana Group of Schools](#) | 2019

CERTIFICATIONS

Azure Data Engineer Associate — Microsoft Certified

Data Visualization using Python — IBM

Deep Learning Fundamentals — IBM / Cognitive Class

Python for Data Science — DataQuest

Cloud Computing — NPTEL

Silver Badge – IoT — NPTEL

Microsoft Excel — Coursera

ACHIEVEMENTS

- 5th Place – PSGiTech HackFest 2K24 (SAP); 200+ teams
- 1st Prize – Paper Presentation, SUNRISE TECH FEST 2K23
- 3rd Prize – IDEATHON: Viksit Bharat @2047, VRSEC
- Hosted 3-day Frontend Dev Workshop, Innovista Club (50+ attendees)
