

Professional Summary

- Recent graduate in Artificial Intelligence and Machine Learning (B. Tech AI & ML) with a strong foundation in programming, data analysis, and intelligent systems.
- Successfully completed a structured internship program at Cognizant, gaining hands-on experience in Core Java, SQL, Functional Testing, and Selenium Automation.
- Proficient in applying Object-Oriented Programming (OOP) concepts, working with collections, exception handling, file operations, and JDBC in Java.
- Gained practical exposure to manual and automated testing techniques including UI and API testing, regression testing, and Agile testing using tools like Jira, Postman, and REST Assured.
- Developed and maintained automation scripts using Selenium WebDriver, TestNG, and Page Object Model (POM) frameworks, with integration into CI/CD pipelines using Git, Maven, and Jenkins.
- Participated in multiple code challenges, skill-based assessments, and real-time projects including mini projects, hackathons, and mentor-led sessions, demonstrating strong problem-solving and collaboration skills.
- Familiar with DevOps practices and tools such as Docker, and gained exposure to GenAI fundamentals, enhancing understanding of emerging AI technologies.
- Experienced in working within Agile environments, attending daily stand-ups, sprint planning, and review meetings, and contributing to test planning, execution, and reporting.
- Strong analytical mindset with the ability to learn quickly, adapt to new technologies, and contribute effectively to team goals.
- Currently undergoing transition from Intern to Full-Time Employee (FTE) at Cognizant, with a keen interest in applying AI-driven approaches to software quality assurance and automation.

Technical Skills

Skill Area	Tools & Technologies
Programming Languages	Java
Database	MySQL, SQL (DDL, DML, Joins, Subqueries)
Testing Tools	Selenium WebDriver, TestNG, Jira
Automation Frameworks	Page Object Model (POM), Apache POI, Cucumber
DevOps Tools	Git, Maven

Skill Area	Tools & Technologies
Methodologies	Agile, STLC, Functional Testing, Regression Testing

Educational Qualification

Degree	Year of Passing
B. Tech in Artificial Intelligence and Machine Learning	2025

Experience

Role/Organization	Duration
Intern, Cognizant, Bengaluru	April 2025- July 2025

Certification

- 1) Microsoft Certified: Azure Data Engineer Associate
- 2) Data Visualization using Python - IBM

Professional Experience

Cognizant, Bengaluru.
Intern

Project: 1

Title : Identify New Bikes – Hackathon Project

Period : April 2025- July 2025

Project Description

This project was part of a hackathon initiative aimed at building automation solutions for real-world use cases. The objective was to extract and display upcoming bike details such as name, price, and expected launch date for Honda bikes priced under ₹4 Lakhs. Additional tasks included automation of used car listings, error message capture during login attempts, and dynamic content extraction from web pages.

Role and Responsibilities

- Automated extraction of upcoming bike details using Selenium WebDriver.
- Applied filters to identify Honda bikes under ₹4 Lakhs and captured launch information.
- Simulated login attempts and captured error messages for validation.
- Handled browser windows and frames to extract menu items and navigate pages.
- Participated in form automation and negative testing scenarios.
- Collaborated with team members and mentors during project execution.
