SUMMARY

AI/ML Engineer with a B.Tech in Artificial Intelligence & Machine Learning (GPA 8.06/10) and proven experience building end-to-end ML pipelines. Hands-on with Python, Scikit-learn, XGBoost, TensorFlow, and cloud platforms (Azure certified, AWS). Professional background in data validation, cloud monitoring, and CI/CD at a US FinTech firm provides a strong foundation for deploying production-ready AI/ML solutions.

TECHNICAL SKILLS

AI / ML: Python, Scikit-learn, XGBoost, Random Forest, TensorFlow, Keras, Deep Learning, Pandas, NumPy, Matplotlib, Seaborn
Generative AI: LLM fundamentals, Prompt Engineering, Azure AI Services, IBM Deep Learning (Cognitive Class)
Cloud & MLOps: Microsoft Azure (Certified), AWS (CloudWatch, Lambda, Step Functions, Datadog), Git, GitHub, Jenkins, Docker, Maven
Data & Databases: PostgreSQL, MySQL, SQL (DDL · DML · Joins · Subqueries), Data Visualisation
Languages: Python · Java · SQL · C#

AI / ML PROJECTS

California House Price Prediction — Python · XGBoost · Random Forest · Scikit-learn · Pandas · Matplotlib

- Built an end-to-end regression pipeline on **20,000+ records**; performed EDA, feature engineering, and hyperparameter tuning.
- Achieved **$R^2 = 0.85$** identifying location and income as dominant predictors; visualised feature importances with Matplotlib & Seaborn.
- Modelled deployment considerations (inference API design, monitoring) applicable to production ML systems.

Electron Flow — AI-Assisted EV Charging App — Figma · Mobile UX · AI Service Design

- Designed and prototyped a mobile app for on-demand EV charging with smart slot recommendations and secure payment flows.
- Mapped AI-driven personalisation logic (usage pattern analysis, predictive availability) into the product roadmap and UX wireframes.

PROFESSIONAL EXPERIENCE

QA Engineer — AI-Powered FinTech Platform | Cognizant Technology Solutions, Hyderabad Oct 2024 - Present

- Monitored ML-adjacent cloud workflows via **AWS CloudWatch, Step Functions & Lambda**; tracked 5 API KPIs (latency, throughput, error rate) using Datadog dashboards — directly transferable to ML model observability.
- Validated data integrity across **15+ PostgreSQL tables** using complex SQL (Joins, Subqueries) — uncovering 10+ critical data defects; core skill for training-data quality assurance.
- Automated **60+ regression tests** (Rest Assured / Java) cutting manual effort by 40%; integrated into Jenkins CI/CD — foundational for ML experiment tracking and model deployment pipelines.
- Achieved **98% API test coverage** across 20+ REST endpoints; led QA sign-off for 3 major sprint releases with zero critical production defects.

QA Engineer Intern | Cognizant Technology Solutions, Bengaluru

Apr 2024 - Jul 2024

- Automated 30+ UI scenarios (Selenium · POM) cutting regression effort by 35%; validated backend data in MySQL; integrated TestNG into Jenkins CI/CD.

EDUCATION

B.Tech — Artificial Intelligence & Machine Learning

GPA: 8.06 / 10.0

NRI Institute of Technology, Agiripalli · 2021 - 2025

CERTIFICATIONS

Microsoft Certified: Azure Data Engineer Associate (2024) · Deep Learning Fundamentals - IBM/Cognitive Class (2024)
· Data Visualisation using Python - IBM (2024) · Python for Data Science - DataQuest (2024) · Cloud Computing - NPTEL (2024)

ACHIEVEMENTS

5th Place (Regional) PSGiTech HackFest 2K24 - SAP · 1st Prize Paper Presentation SUNRISE TECH FEST 2K23 (AI in QA)
· 3rd Prize IDEATHON Viksit Bharat 2047 · Led 3-day Frontend Workshop, Innovista Club (50+ students)
