AI/ML PROJECTS

California House Price Prediction | Python, XGBoost, Scikit-learn, Pandas, Matplotlib | 2024

- Built supervised ML regression model on 20,000+ records with XGBoost and Random Forest, achieving $R^2 = 0.85$, outperforming linear baseline by 22%.
- Applied full preprocessing pipeline (null handling, encoding, scaling) using Pandas and Scikit-learn; identified location and income as top predictors via feature importance analysis.
- Evaluated using R^2 , RMSE, MAE; tuned hyperparameters via GridSearchCV; visualised correlations and residuals with Matplotlib and Seaborn.

Electron Flow — On-Demand EV Charging App (AI-Powered Concept) | Figma, Product Design, AI Planning | 2024

- Designed AI-driven EV charging app with ML-based demand forecasting to predict peak times and optimise slot allocation across 3 revenue streams (fees, subscriptions, partnerships).
- Created 15+ wireframes in Figma covering booking, scheduling, and payment flows; presented AI product architecture to faculty panel.
